

## COVER LETTER.

Dear client,

I am a software engineer with skills in front end development , APIs and backend together with database management by p .Passion has made me learn about computers even though doing something totally different at the university.I have built applications i never thought i could.Solving bugs is a great place for me to be in and i would love to drive that passion in this organisation.I have built projects one that even helps students from my course gets jobs or internship after completing their studies .I will deliver with commitment.Below is my github repository.

<https://github.com/MosesOchieng>

I am looking forward to working for your company in being part of its rich work portfolio and learning .

Moses Ochieng  
Software Engineer.
